#### MESSAGE FROM THE PRINCIPAL

Salem High School is a comprehensive high school, whose goal is to prepare every student to be college and career ready. We offer a full complement of courses in language arts, mathematics, humanities, and science at the College Preparatory, Honors, AP, and IB level, as well as three world languages and technology enhanced courses related to the effective use of computers for research and graphic design. Some of our academic courses award dual credit with Salem Community College. Additionally, our AP program allows our students to complete college level work, while gaining college credits at Thousands of Colleges & Universities. We also have computer labs with Internet access, an on-line media center, five new science labs, SmartBoards in all classrooms, and three computer applications labs for graphic design strands leading to specialized study in the fields of digital imaging, desktop publishing, and image editing. We also offer a video production program, which provides instruction in digital video editing using state of the art hardware and software, and develops and broadcasts original programming on local cable station channel 9. Salem High School is well equipped to meet the technological demands of today's education. We offer the International Baccalaureate Diploma Programme, and this fall we started Project Lead The Way (PLTW), in conjunction with the Rowan University School of Engineering.

John R. Mulhorn Principal, Salem High School

### **Counseling Philosophy**

School Counseling at Salem High School is an integral part of education. Academic advising, counseling, and career education are everyone's responsibility. Our students are the focus. The programs in our educational program are designed to help everyone achieve his/her potential. A cooperative effort involving students, parents, teachers, counselors and administrators is needed to help guide students for the most appropriate, challenging program of studies for responsible and productive citizenship.

Students and school counselors are matched primarily by alphabetical order. Students with last names beginning with A to E work with Ms. Helen M. Hall. Those with last names beginning with F to O work with Mr. David Hunt. All other students work with Mrs. Regina Gatson. A change of counselor is possible through a written request to the principal.

### **Program Selection**

The programs students pursue in high school should reflect their aspirations, abilities, and achievements. Since a young adult's post-high school plans for employment, college or vocational technical training sometimes change, students are encouraged to review on occasion the match between their chosen program of study and their long range goals.

Courses at Salem High School provide students with the opportunity to meet the educational needs. Beyond the state or local requirements, students are encouraged to select courses that are appropriate for their abilities and aspirations.

Counselors are available to advise students on their academic program. The counselor reviews a student's test scores, past and current academic performance, and career aspirations. Together with teachers' recommendations for courses and academic levels, the final choice, aside from honors and advanced placement courses which have specific academic performance criteria for admission, is determined by the students and their parents. Students having difficulty in an academic area may receive additional help from their teachers, or further instruction upon the recommendation of the Child Study Team. This recommendation follows an extensive evaluation of the student by the Child Study Team. Parents, teachers, or students may initiate a review by referring the student to the Intervention and Referral Service team.

### **Graduation Requirements**

Graduation requirements are established by the Department of Education of the State of New Jersey and the Salem City Board of Education. The requirements for each student are established at the time of entrance to high school.

The credit and course requirements to qualify for graduation are as follows:

### • Earn a minimum of 130 credits

English Language Arts

### • State graduation requirements (must meet ONE criteria from English Language Arts and Mathematics

Mathematics

English Et	inguage into	Triatile Illatio
Passing score on a PAF	RCC ELA Grade 9 or	Passing score on PARCC Algebra I or

• 1 credit year	Practical Arts	
• 1 credit year	Physical Education	on and Health for each year at Salem HS
• 1 credit year	Careers/Economic	ies
		_

Students passing a course earn credits based on the number of periods a class is scheduled to meet each week.

If a student should fail a required English or social studies, math or science course, that course must be made up in summer school or repeated.

### **Course Structure**

Courses at Salem High School are:

### Of two lengths:

• 5 credit or full year

These courses last for all four marking periods of the school year.

• 2.5 credit semester or half year

These courses last for two marking periods, (one semester) and finish after a half year.

#### Of three levels:

### International Baccalaureate (IB)

These courses are for students with outstanding motivation and achievement who intend to qualify for the International Baccalaureate Diploma. In subjects for which they are offered, these courses carry the most demanding workload for students at the grade level.

### • Honors or Advanced Placement

These courses are for students with outstanding motivation and achievement. Courses for which an honors level will be offered are identified with a (Hn) next to the course name.

• College Preparatory

These courses are intended to prepare students for the demands and challenges of college level work after graduation.

### Of two kinds of credit:

• <u>Satisfying subject area requirements and graduation requirements</u>
Most courses fit this category. They satisfy the subject area credit requirements on page 5 and yield credit toward high school graduation.

### • Provide graduation credit only

Some courses do not count toward subject area requirements, but they do count toward graduation. They are elective courses or they may be remedial courses in nature and also carry PARCC designation.

## **Grading System Current including graduating Class of 2019**

Academic Grades	Numerical Grades	UnWeighted	Honors Weighted	AP Weighted	IB Weighted
A	92-100	4	5	5	5.25
В	85-91	3	4	4	4.25
C	78-84	2	3	3	3.25
D	70-77	1	1	1	1
F	0-69	0	0	0	0

## Grading System Starting with graduating Class of 2020

Academic Grades	Numerical Grades	UnWeighted	Honors Weighted	AP Weighted	IB Weighted
A	90-100	4	5	5	5.25
В	80-89	3	4	4	4.25
C	70-79	2	3	3	3.25
D	65-69	1	1	1	1
F	0-64	0	0	0	0

### **Honors & Advanced Placement Programs**

In all Honors classes due dates are rarely, if ever, adjusted. Late work will take a ten-point deduction per day and will not be accepted after the second day without an attached note from the student's parent/guardian. No work will be accepted after five days beyond the due date. Students are required to complete an intense amount of independent reading and writing; more than would be expected of students in a college prep level courses. Students will be allowed to request honors courses during their freshman and sophomore years only. Honors level study during the junior and senior years must be at the AP or IB level.

### **International Baccalaureate Diploma Program (IB):**

Life in the 21st century, in an interconnected, globalized world, requires critical-thinking skills and a sense of international-mindedness, something that International Baccalaureate® (IB) Diploma Program students come to know and understand. The IB Diploma Program is designed as an academically challenging and balanced program of education with final examinations that prepares students, normally aged 16 to 19 for success at university and life beyond. The program is normally taught over two years and has gained recognition and respect from the world's leading universities. Honors Students, who are entering their junior year are eligible to enter the program. For more information contact our Guidance Office.

### Forman Sinnickson Acton

Professor Emeritus of Computer Science at Princeton University, Dr. Forman Acton died February 18, 2014 at the age of 93. He left a \$30 million endowment toward a foundation to benefit the Salem City children.

Forman S. Acton was born on 1920 in Salem, New Jersey, where ancestors of the Sinnickson and Acton families had lived since the 1600's. Forman attended the Salem School District, leaving to attend high school at Philips Exeter Academy in New Hampshire where he graduated in 1939. At Princeton University he majored in engineering and earned his Bachelor's of Science degree in 1943 as well as a Master's of Science degree in chemical engineering in 1944. Mr. Acton began teaching at Princeton shortly thereafter, but was drafted into the U.S. Army in June of 1944 and was stationed in Spartansburg, South Carolina. During his tenth week of basic training, Forman was transferred to a technical plant in Oak Ridge, Tennessee. This plant produced the U-235 isotope which was the explosive element of the Hiroshima bomb. In December of 1945, Forman was given an Honorable Discharge from the Army Corp of Engineers.

Forman went on to Ohio State University to work with John L. Synge for six months. He left with Professor Synge to pursue mathematical applications in engineering. Forman was a graduate student for three years at Carnegie Institute of Technology to earn his Doctor of Science degree in applied math. He accepted a job with the National Bureau of Standards at an institute for Numerical Analysis at UCLA which was devoted to the new electronic computing machines. Forman worked on one of the first digital computers called SWAC.

In 1952, Acton returned to Princeton to direct the Analytical Research Group working on military weapons. While contributing to systems such as the U-2 spy plane and the Nike missile, Acton became an expert in using and teaching others to use another of the very first computers, the IAS machine. During this time Acton worked with other important figures including Princeton Professor John Tukey who coined the terms "software" and "bit" and Thomas Kurtz who earned a Ph.D. in mathematics in 1956 and went on to co-invent the computer language BASIC.

In 1963, Acton accompanied the first computer to the Indian Institute of Technology near Kanpur, India where he set up the computer center and began teaching classes. In the spring of 1967 Forman returned to teach at Princeton. In 1985, the Computer Science Department established the Engineering Department of Princeton. Forman authored three published textbooks: Analysis of Straight-Line Data, Numerical Methods That Usually Work, and Real Computing Made Real-Preventing Errors in Scientific and Engineering Calculations. Forman taught for 37 years and retired in 1990. His generosity will benefit the students of the Salem City School District for generations to come.

Page 9

### **IB Courses**

### **IB Biology HL**

Grades 11-12

6 credits

Prereq: CP or Honors Biology

The IB Diploma Programme Biology higher level course covers the relationship of structure and function at all levels of complexity. Students learn about cell theory, the chemistry of living things, plant science and genetics, among many other topics to further their understanding of and learning about biology. Throughout this challenging course, students become aware of how scientists work and communicate with each other. Further, students enjoy multiple opportunities for scientific study and creative inquiry within a global context.

### IB Chemistry HL Grades 11-12 6 credits

**Prereq: CP or Honors Chemistry** 

This course is designed as a 2-year course that meets the higher level requirements for the Group 4 (Experimental Sciences) component of the International Baccalaureate Diploma Program. The course work and textbook are at the college level. This course will focus on not only the basic content knowledge of Chemistry, (covered in year 1), but also spend the second year focusing on higher level or advanced topics in the course. Students will also experience a heavy emphasis on technical writing in the sciences, through writing lab reports for their Internal Assessments. This course is for students that plan to enter the engineering field.

### IB Math Calculus SL Grades 11-12 5 credits Prereq: CP or Honors Algebra II

The course focuses on introducing important mathematical concepts through the development of mathematical techniques. The intention is to introduce students to these concepts in a comprehensible and coherent way. Students should, wherever possible, apply the mathematical knowledge they have acquired to solve realistic problems set in an appropriate context.

The internally assessed component, the exploration, offers students the opportunity for developing independence in their mathematical learning. Students are encouraged to take a considered approach to various mathematical activities and to explore different mathematical ideas. The exploration also allows students to work without the time constraints of a written examination and to develop the skills they need for communicating mathematical ideas.

This course covers a broad range of topics including: probability, vectors, differential calculus, and integral calculus. The internal assessment is to be finalized during the first half of this course and students spend the second half of this course preparing for the external assessment.

#### Grades 11-12 5 credits

#### **IB Math Studies SL**

Prereq: CP or Honors Geometry

This is a 2-year course preparing students to take the Math Studies SL exam in May of their senior year. Topics covered in this course include: Sequences and Series, Descriptive Statistics, Logic, Coordinate Geometry, Trigonometry, Exponential Functions and Differential Calculus. In addition to the IB, exams a project, no more than 2000 words, is required that counts as 20% of the IB grade for the IB diploma.

### IB Language (English) A: Literature HL Grades 11-12 5 credits Prereq: CP or Honors English II

This is a two-year study of literature as art which challenges students to develop and communicate knowledge and understanding of that art. The first year begins with three English works of different genres and eras, culminating in an oral presentation on one; it ends with three non-English works of different genres, cultures, and eras, culminating in a written essay on one. The second year involves English works of different cultures and eras, beginning with a select poet's poetry, a select novel, and a select play and culminating in an oral commentary on one of the poems and a discussion of the novel or play; the year ends with four works of the same genre and culminates in a written essay on two or more of them and a written commentary on a never-studied work.

### IB History of Americas HL Grades 11-12 5 credits Prereq: CP or Honors US History I

This history course satisfies the IB Group 3 "Individuals and Societies" component of the IB Diploma Program. It will be taught over two years and will follow the Higher Level (HL) core syllabus. The first year of History of the Americas, taught in the 11<sup>th</sup> Grade, will be a general study of 20<sup>th</sup> Century US History. However, there will be a more in-depth study on subjects including: comprise of the Depression, World War II and the Cold War.

The year two curriculum consists of one Prescribed Subject, The Arab-Israeli Conflict (1945-1979) and two World History Topics: Causes, Practices and Effects of War and Origins and Development of Authoritarian and Single-Party States. In addition, students will make connections between the different historical events and contemporary global affairs. Finally, IB students will use what they have learned over the two years. Lastly, the Internal Assessment, consisting of a Historical Investigation, will be introduced junior year. Students will be expected to work on it over the summer and then complete a Final Draft their senior year.

#### IB Art SL Grades 11-12 5 credits

This is a two year program, which encourages students to challenge their creative thinking in many ways including; investigating artists from many cultures, provoking analytical skills, cultivating problem-solving skills and developing their own studio work. Students develop technical proficiency and confidence experimenting with many types of media within their studio work. Students examine different perspectives and select artists that inspire ideas to investigate and create an original portfolio. Students discuss and articulate their process by comparing and contrasting works, and recording their research in sketches and a 9-18 page digital portfolio. Students exhibit their works with a curatorial rationale about their work. Students are required to work at home in addition to class time and required to do assignments over the summer. Students are required to visit galleries and attend museum exhibitions.

#### IB Dance SL Grades 11-12 5 credits

Consistent with the educational philosophy of the IB, the Diploma Programme dance curriculum aims for a holistic approach to dance, and embraces a variety of dance traditions and dance cultures—past, present and looking towards the future. Performance, creative and analytical skills are mutually developed and valued whether the students are writing papers or creating/performing dances. The curriculum provides students with a liberal arts orientation to dance. This orientation facilitates the development of students who may become choreographers, dance scholars, performers or those, more broadly, who seek life enrichment through dance."

#### IB Music SL Grades 11-12 5 credits

Sudents develop their knowledge and potential as musicians, both personally and collaboratively. Involving aspects of the composition, performance, and critical analysis of music, the course exposes students to forms, styles and functions of music from a wide range of historical and socio-cultural contexts. Students create, participate in, and reflect upon music from their own background and those of others. They develop practical and communicative skills which provide them with the opportunity to engage in music for further study, as well as for lifetime enjoyment.

### IB Language B Spanish Ab Initio: Grades 11-12 5 credits

This course is an accelerated and rigorous introduction and continuation of Spanish language and culture. This course is completed over two years of study. Ab Initio is designed for students with no previous Spanish experience. This course covers a variety of themes and topics: daily routines, education, food and drink, personal details/appearance, physical health, relationships shopping, employment, entertainment, holidays, media, sport, technology, transport, environmental concerns, global issues, neighborhood, physical geography, town and services and weather. Students will be assessed internally and externally by the IB program for their skills in listening, speaking, reading and writing.

### IB Language B Spanish: SL Grades 11-12 5 credits Prereq: CP or Honors Spanish II

This course is an accelerated and rigorous continuation of Spanish language and culture. This course is completed over two years of study. IB Spanish B is designed for students who have previously completed honors Spanish I and II. In this course, the students will be able to master all topics. The main topics are social relationships, communication/media, global issues, health and customs/traditions. The sub-topics of Español 3 are relationships, cultural/religious celebrations, media/censorship, nature/natural disasters, diet/nutrition, hygiene, art and fashion. Students and teacher will exclusively speak and write in Spanish, which will advance and strengthen the students' proficiency from Intermediate to Pre-Advanced range. Students will be assessed internally and externally by the IB program for their skills in listening, speaking, reading and writing.

### IB Theory of Knowledge/CAS/EE Grades 11-12 5 credits

TOK plays a special role in the Diploma Programme by providing an opportunity for students to reflect on the nature of knowledge, and on how we know what we claim to know. This is a two year course.

The fundamental question of TOK is "how do we know that?" Students are encouraged to think about how knowledge is arrived at in different disciplines, what the disciplines have in common and the differences between the disciplinary. TOK both supports and is supported by the study of other DP subjects, as students are required to explore knowledge questions against the backdrop of their experiences in their other DP subjects. Discussion and critical reflection form the backbone of the TOK course, centering around discussions of questions such as: What counts as evidence for X? What makes a good explanation in subject Y? How do we judge which is the best model of Z? How can we be sure of W? What does theory T mean in the real world? How do we know whether it is right to do S? Through discussions of these types of questions students gain greater awareness of their personal and ideological assumptions, as well as developing an appreciation of the diversity and richness of cultural perspectives. The TOK course is assessed through an oral presentation and a 1600 word essay.

Creativity, Action, Service (CAS) is at the heart of the Diploma Programme, and is one of the three essential core elements in every student's Diploma Program. Students are involved in a variety of self-initiated and collaborative experiences that deepen their understanding of academic studies. The CAS Strands are: Creativity- Arts, and other experiences that involve creative thinking; Action-Physical exertion contributing to a healthy lifestyle; Service: an unpaid and voluntary exchange that has a learning benefit for the student. The rights, dignity and autonomy of all those involved are respected. The emphasis in CAS is on helping students to develop their own identities, in accordance with the ethical

principles embodied in the IB mission statement and the IB learner profile. Possibly, more than any other component in the Diploma Programme, CAS contributes to the IB's mission to create a better and more peaceful world through intercultural understanding and respect. This is a requirement in order to be an IB graduate.

The extended essay is an in-depth study of a focused topic chosen from the list of approved Diploma Programme subjects-normally one of the student's six chosen subjects for the IB diploma. It is intended to promote high-level research and writing skills, intellectual discovery and creativity. It provides students with an opportunity to engage in personal research in a topic of their own choice, under the guidance of a supervisor (a teacher in the school). This leads to a major piece of formally presented, structured writing, in which ideas and findings are communicated in a reasoned and coherent manner, appropriate to the subject chosen. The Extended Essay can be no more than 4,000 words. This is a requirement in order to be an IB graduate.

Credits = \*IB graduation requirement

### **English**

### College Prep. English I

Grade 9

5 credits

This course is designed to introduce students to American, British, and World literature thereby providing a framework for subsequent literature study. Various genres will be explored to include novels, drama, poetry, and short stories. Non-fiction works will be read as well. Vocabulary and reading comprehension strategies will be emphasized. A major component of this course is writing, and students are required to maintain a portfolio of their work. In addition, students will learn the research process culminating in a research paper. Critical and analytical skills in both reading and writing will be a focus of this course.

### Honors English I Grade 9 5 credits

This is an accelerated study of various genres, including the novel, the play, the short story and the poem, with a strong emphasis on the study of mythology. It is a well-rounded course, and students will be expected to look at literature from various perspectives including art, film, performance, psychology and philosophy. This course is an academically enriching program that builds upon basic skills and concepts that students learned in middle school language arts. The course focuses most heavily on reading and analyzing literature, writing coherently and effectively, and increasing command of vocabulary. In addition, this course emphasizes public speaking and critical thinking skills. A research paper is a course requirement, and students will continue to build their writing portfolios.

### College Prep. English II Grade 10 5 credits Prereq: CP English I

A survey of American literature is the basis for this course. Students will continue to read critically and analytically a variety of genres to include drama, novels, short stories, and poetry. Non-fiction will be read as well. Moreover, vocabulary and reading comprehension will be emphasized to enhance students' skills. An emphasis on writing will be continued with students maintaining a portfolio of their work. The study of the research process will be continued with students composing a research-based literary analysis to reflect this area of concentration.

### Grade 10 5 credits

### Honors English II

Prereq: CP or Honors English I

Honors English II is an accelerated course designed to meet the academic needs of and challenge the superior English student through an offering of intensive reading, writing, and research opportunities. The course focuses intensively on writing, and offers a survey of American literature at advanced levels. The course attempts to reconstruct the historical and cultural context in which these literary works were produced. Additionally, the course will look at the politics of literary reputation and trace the trajectory of fame and literary repute for each writer. This course is designed to make the student a better reader and writer with emphasis on critical thinking and writing. The course stresses literary analysis, well-organized compositions, analysis of rhetorical devices, grammatical forms and usage, and Scholastic Aptitude Test (SAT) preparation. Course content builds on the use of the pre-tenth grade summer reading list. Throughout, students will develop literary interpretations and critical essays using primary literary sources. This course requires a greater degree of independence and competence in communicating and critical thinking. A research paper is a course requirement, and students will continue to build their writing portfolios.

### College Prep. English III

Grade 11 5 credits

Prereq: CP English II

British literature is the focus of this course which will include a Shakespearian play, novels, poetry, and short stories. Non-fiction will be included also. Students will continue to hone their comprehension, critical, and analytical skills in reading; comprehension strategies, and vocabulary will be emphasized to enhance these skills. Writing skills will continue to be reinforced and a writing portfolio will be maintained. A literary analysis is required.

### Adv. Placement Language and Composition Grade 11 5 credits Prereq: CP or Honors English II

The purpose of this course is to help students "write effectively and confidently in their college courses across the curriculum and in their professional and personal lives" (College Board, *AP English Course Description*, pg 7). This course is structured to meet the rigorous requirements and guidelines of the current *AP English Course Description*. With the use of rhetorical strategies and an emphasis on nonfiction writing, students will learn how to become analytical thinkers, critical readers, and clear communicators in both writing and speech.

### College Prep. English IV Grade 12 5 credits Prereq: CP English III

Students will explore the literature of various cultures through the study of World literature. Students will continue to deepen their comprehension, critical, and analytical reading skills. Vocabulary study will be a major component of this course as well. Students will continue to broaden their writing experiences and a portfolio will be maintained. A research-based literary analysis will be required. In addition, students will explore the college essay and application.

### Adv. Placement English Literature and Composition Grade 12 5 credits Prereq: CP English III or AP Language and Composition

Advanced Placement Literature is a senior elective English course taught at a college level with the content, approaches, and expectations commensurate with a college English course. In the spring, students are expected to take the Advanced Placement Exam in literature and receive college credit for scores of 3, 4, or 5, depending on the requirements of individual colleges. This is a course which analyzes *how* an author makes meaning; it deals in elements of style analysis in the novel, drama, and poetry. Assessment is primarily through in-class timed writings similar to those actually done on the AP Exam and formal papers written outside of class. All of these count as test grades. The course also includes literature circles, oral presentations, and seminars led by individual students which count as either tests or quizzes, depending on the amount of work involved. Interested students must carry at least a "B" as a final average from their Honors English III or Honors English IV class.

### Intensive English Grades 9-12 2.5/5 credits

Students who have low scores (level 1 or 2) on the literacy portion of the PARCC Assessment, or a letter grade of C, D, or F for their final grade for previous year's English course can be assigned this course.

### **English Electives**

#### African American Literature Grades 10-12 2.5 credits

This course is an overview of African American Literature from its ancient beginnings to modern times. The course will explore this literature's effects upon the American literary, social, cultural, and political landscapes. Visits to various museums and other relative venues will be used to emphasize this literature.

### **Mathematics**

### College Prep. Algebra I

Grade 9

5 credits

College Prep Algebra I is designed and recommended for the student who has mastered basic arithmetic and pre-algebra topics, and plans to attend college following high school. This course places emphasis on the structure of algebra, real numbers, various problem-solving techniques, and the gradual development of deductive reasoning. Basic concepts reviewed include: number lines, sets, variables, simplifying expressions, solving equations and inequalities with one and two variables, graphing equations and inequalities, solving systems of equations and inequalities, and operations with polynomials. Emphasis is also placed on mathematical language precision.

### **Honors Algebra I**

Grade 9

5 credits

Honors Algebra I is designed and recommended for the student who has excelled in arithmetic and pre-algebra topics, and plans to attend college following high school. Similar to college prep algebra I, this course places emphasis on the structure of algebra, real numbers, various problem-solving techniques, and the gradual development of deductive reasoning. Basic concepts reviewed include: number lines, sets, variables, simplifying expressions, solving equations and inequalities with one and two variables, and graphing equations and inequalities. Honors algebra I continues by exploring advanced topics such as: solving and graphing systems of equations and inequalities, solving and graphing absolute value equations and inequalities, solving and factoring polynomials, and exponential growth and decay. Emphasis is also placed on mathematical language precision. Students electing the honors level must earn a final grade of 'A' or 'B' in their 8<sup>th</sup> grade mathematics course.

### College Prep. Geometry Grades 10 - 12 5 credits Prereg: CP or Honors Algebra I

This course is designed for sophomores and follows Algebra I. This course follows the New Jersey Core Curriculum Content Standards. Topics include basic terms and concepts of geometry, analyzing, defining, and applying relationships between lines and polygons, drawing geometric figures in a coordinate plane and justifying the properties of the figures, using theorems and postulates to determine similarity and congruence of polygons, analyzing properties of circles, analyzing properties of two- and three-dimensional figures, using trigonometric ratios to determine lengths and measures of segments and angles, and performing geometric constructions and designs.

### Honors Geometry Grades 10 - 12 5 credits

Prereq: CP or Honors Algebra I

This course is designed for sophomores following Honors Algebra I and for freshmen who have successfully passed the Algebra I Placement Test. Sophomores may take it at the same time as Honors Algebra II in order to take

Calculus in grade 12 or IB Math in grades 11 and 12. This course follows the New Jersey Core Curriculum Content Standards. Topics include basic terms and concepts of geometry, analyzing, defining, and applying relationships between lines and polygons, drawing geometric figures in a coordinate plane and justifying the properties of the figures, using theorems and postulates to determine similarity and congruence of polygons, analyzing properties of circles, analyzing properties of two- and three-dimensional figures, using trigonometric ratios to determine lengths and measures of segments and angles, and performing geometric constructions and designs.

### College Prep. Algebra II Grades 10 - 12 5 credits Prereq: CP or Honors Geometry

College Prep Algebra II continues mathematics preparation for the college bound student. Operations with algebraic expression, linear operations with algebraic expression, linear equations, and inequalities are reviewed. The course continues with the study of relations, functions, rational and irrational numbers, complex numbers, exponents, systems of equations, and graphing of linear and quadratic functions. Emphasis is on understanding concepts, not merely technique.

### Honors Algebra II Grades 10 - 12 5 credits Prereq: CP or Honors Geometry

Honors Algebra II continues mathematics preparation for the college bound student. Operations with algebraic expressions, linear operations with algebraic expressions, linear equations, and inequalities are reviewed. The course continues with the study of relations, functions, rational and irrational numbers, complex numbers, exponents, systems of equations, and graphing of linear and quadratic functions. Additional topics include: rational exponents, radical function, exponential functions, logarithmic functions, polynomial expressions and equations. Emphasis is on understanding concepts, not merely technique. Sophomores may take this course at the same time as Geometry in order to take Calculus in grade 12. One written report is required of each student on some topic appropriate to this course.

### Honors Pre Calculus Grades 11 - 12 5 credits Prereq: CP or Honors Algebra II

Qualified students are encouraged to take this course as preparation for calculus and other college level mathematics. It should definitely be taken by students who intend to major in mathematics, business, engineering, or science in college. This course consists of topics such as coordinate geometry, functions, inverses, logarithms, and trigonometry.

### AP Calculus Grade 12 5 credits

### Prereq: Pre Calculus

It is designed for students desiring either advanced placement in college mathematics or a course in the Calculus before beginning college work in fields such as science, business, engineering, or mathematics. Topics include analytic geometry, differential and integral calculus of algebraic functions, elementary transcendental functions, applications of differential calculus, and geometric and physical applications of integration. The class covers all areas presented on the AP Calculus test.

.

### Intensive Algebra I

### Grades 9-11

5 credits

Students who have low scores (level 1 or 2) on the math portions of the PARCC Assessment, or a letter grade of C, D, or F for their final grade for previous year's math course can be assigned this course.

### **Intensive Algebra II**

#### Grades 9-11

5 credits

Students who have low scores (level 1 or 2) on the math portions of the PARCC Assessment, or a letter grade of C, D, or F for their final grade for previous year's math course can be assigned this course.

#### **Intensive Geometry**

### Grades 9-11

5 credits

Students who have low scores (level 1 or 2) on the math portions of the PARCC Assessment, or a letter grade of C, D, or F for their final grade for previous year's math course can be assigned this course.

### College Algebra C.L.E.P.

Grade 12

5 credits

All students enrolled in the class will have the option to take the C.L.E.P. exam for college credit. The examination covers material that is usually taught in a one-semester college course in algebra. Nearly half of the test is made up of routine problems requiring basic algebraic skills; the remainder involves solving non-routine problems in which you must demonstrate your understanding of concepts. The test includes questions on basic algebraic operations; linear and quadratic equations, inequalities, and graphs; algebraic, exponential, and logarithmic functions; and miscellaneous other topics.

### Science

#### College Prep. Biology

### Grade 9

6 credits

Biology is the study of life; plants, and animals are studied as organisms which are related in their cellular structure and function. Other areas considered are reproduction, heredity, microbiology, and ecology. Laboratory exercises are performed to strengthen the understanding of concepts.

### Honors Biology Grade 9 6 credits

Honors Biology involves a deductive approach to the study of living things. Beginning with the characteristics that all organisms share, then delving into each of those concepts in depth, providing a broad and thorough background. Ways of exploring how and why things happen focus on solving problems by testing possible solutions to see whether they work. Participation in the County Science Fair is encouraged and supported.

### AP Biology Grades 11-12 6 credits

AP Biology is an intensive course designed to be the equivalent of an introductory biology course taken in college. The emphasis is on developing an understanding of biological concepts rather than an accumulation of facts. The student should understand and appreciate the science of biology as a process and a personal experience in scientific inquiry that develops their problem solving and critical thinking skills. This course also prepares the high school student to take the AP exam given in May. In order to pass the exam (usually this is with a score of 3 or higher), students must be highly motivated and driven to excel in this challenging course. The format for this class will be primarily lecture and lab, supported by interactive labs, and hands on activities.

### College Prep. Chemistry Grade 10-11 6 credits Prereq: CP or Honors Biology

In this course heavy reliance is placed upon laboratory work so that chemical principles can be drawn from the student's experiences. Observations and measurements lead to the development of unifying principles and these principles are used to interrelate diverse phenomena. The atomic theory, the nature of matter in various phases, the periodicity of the elements and their physical properties, and the mole concept are emphasized. Chemical principles are stressed. Upon the completion of this course, students should have a firm basis upon which to draw in any post-secondary study of this subject. This course is recommended for students preparing for college.

### Honors Chemistry Grade 10-11 6 credits Prereq: CP or Honors Biology

In this course heavy reliance is placed upon laboratory work so that chemical principles can be drawn from the student's experiences. Observations and measurements lead to the development of unifying principles and these principles are used to interrelate diverse phenomena. The atomic theory, the nature of matter in various phases, the periodicity of the elements and their physical properties, and the mole concept are emphasized. Chemical principles are stressed. Upon the completion of this course, students should have a firm basis upon which to draw in any post-secondary study of this subject. This course is recommended for students preparing for college.

### Adv. Placement Chemistry Grade 11-12 6 credits Prereq: CP or Honors Chemistry

This course is designed to be the equivalent of the General Chemistry course usually taken during the first college year. This course is taken with the idea in mind that students will take the AP Exam.

### CP Physics Grade 11 6 credits

### Prereq: CP or Honors Chemistry and Biology

Physics is the study of matter and its motion through space and time, along with related concepts such as energy and force. This course focuses on problem-solving as well as guided-inquiry or open inquiry of hands-on activities, and labs. Students will be introduced to the topics of one-dimensional kinematics, projectile motion, Newton's laws, energy & conservation of energy, and momentum and conservation of momentum. Opportunities are provided to understand the ideas of objects and systems, forces, and waves.

### Adv. Placement Physics Grade 11-12 6 credits Prereq: CP or Honors Chemistry and CP or Honors Algebra II

Physics is the study of the relationship of matter and energy. The concepts are developed in a logical sequence from motion to fission. Ideas from the study of mechanics, heat, light, and electricity serve to prepare a broad understanding of classical Newtonian physics. Experiments, films, demonstrations, and lectures are combined to strengthen principles studied. Topics include scientific notation, use of trigonometric functions, graphic analysis, vectors, dynamics, kinematics, momentum and The Conservation of Momentum, Keeler's Law, Newton's Law, work and power, energy and the conservation of energy, heat, electricity, the Quantum Theory, and the atom.

### CP Environmental Science Grade 11 6 credits Prereg: CP or Honors Chemistry and Biology

This course is an introduction into environmental science for students who wish to learn more about the environment, but are not considering a career in science. Students will be engaged in problem solving and designing solutions for various environmental problems of the world today. Students will use scientific principles, concepts, and methods to understand humans relationships with other organisms and the world. This course involves a combination of earth science, biology, chemistry, and geography, and there will be a heavy emphasis on lab experiences.

### AP Environmental Science Grades 11 - 12 5 credits

Prereq: CP or Honors Biology

Emphasizing the conceptual understanding of natural systems, this course will provide an ecosystems approach to the study, understanding, and solution of today's pressing environmental concerns. Offering a balanced perspective that

encourages critical thinking, the class will have broad coverage and unusual insights into general environmental issues studying various ecosystems and the problems they are facing due to an inflated human population.

#### **Science Electives**

College Prep. Anatomy & Physiology Grades 11 - 12 5 credits This course is designed for students interested in entering the health profession through our Medical Technologies Pathway. Emphasis will be placed on function and the basic mechanism of disease. Recent advances in medicine, biotechnology, immunology, and molecular genetics will also be covered. Cell structure, tissue, function, and organ systems are also part of the course.

### **Social Studies**

### College Prep. World History Grade 9 5 credits

College Prep. World History presents a comprehensive exploration of world history with major emphasis upon the Renaissance and Reformation, the Age of Exploration and Empire, Africa, Asia, and the modern world. Added depth is provided by a variety of resources including texts, primary source reading, special projects, written and oral reports, extensive group research activities and a rigorous focus on research skills. Students selecting thonors level of this course must earn a final grade of 'A' or 'B' in their 8th grade English course.

### Honors World History Grade 9 5 credits

Honors World History presents a extensive exploration of world history with major emphasis upon the Renaissance and Reformation, the Age of Exploration and Empire, Africa, Asia, and the modern world. Added depth is provided by a variety of resources including texts, primary source reading, academic conversations, historical methods, special projects, written and oral reports, extensive group research activities and a rigorous focus on research skills. Students selecting the honors level of this course must earn a final grade of 'A' or 'B' in their 8th grade English course.

### College Prep. US History I Grade 10 5 credits Prereq: CP or Honors World History

College Prep. U.S. History I is designed to meet the needs of college bound high school students who need added depth rather than added breadth in their approach to United States History. This depth is provided by differentiated materials such as texts, primary source readings, special projects, written and oral reports, increased group research, and a more rigorous emphasis upon research skills. The student will learn basic research techniques including the use of our LRC and inter-library loan systems. Students may interview local resource people and agencies. Course content covers the period of American History from the colonial period to the 1890's.

### Honors US History I Grade 10 5 credits

Prereq: CP or Honors World History

Honors U.S. History I is designed to meet the needs of college bound high school students who need added depth rather than added breadth in their approach to United States History. This depth is provided by differentiated materials such as texts, primary source readings, academic conversations, historical methods, special projects, written and oral reports, increased group research, and a more rigorous emphasis upon research skills. The student will learn basic research techniques including the use of our LRC and inter-library loan systems. Students may interview local resource people and agencies. Course content covers the period of American History from the colonial period to the 1890's.

### College Prep. US History II Grade 11 5 credits Prereq: CP or Honors U.S. History I

College Prep. U.S. History II is a continuation of College Prep. U.S. History I. Course content covers the period from the 1890's to the present. It also involves the study of American forms of government at the federal, state, and local level. The course encourages discussion, interaction, and attendance of public meetings.

### Adv. Placement U.S. Government & Politics Grade 11-12 5 credits Prereq: CP or Honors U.S. History I

The Advanced Placement Program in United States Government and Politics is designed to introduce students to the important facts, concepts and theories pertaining to United Stated government and politics. While engaging in the study of general concepts used to interpret U.S. government and politics and the analysis of specific examples of politics in action, students will develop an analytical perspective on government and politics in the United States. Through this process students will become familiarized with various institutions, groups, core beliefs, and ideas that constitute U.S. government and politics and will become acquainted with the variety of theoretical perspective and explanations for various behaviors and outcomes inherent in the American political system. Students will develop a critical understanding of the strengths and weaknesses of the American political system, as well as their rights and responsibilities as citizens.

### Adv. Placement U.S. History Grades 11-12 5 credits Prereq: Honors U.S. History I or CP world History

The Advanced Placement Program in United States History is designed to provide students with the analytic skills and factual knowledge necessary to deal critically with the problems and materials in United States History. The program prepares students for intermediate and advanced college courses by making demands upon them equivalent to those made by full-year introductory college courses. Students should learn to assess historical materials—their relevance to a given interpretive problem, their reliability, and their importance

--and to weigh the evidence and interpretations presented in historical scholarship. An Advanced Placement United States History course should thus develop the skills necessary to arrive at conclusions on the basis of an informed judgment and to present reasons and evidence clearly and persuasively in essay format.

### **Social Studies Electives**

### African-American History Grades 10-12 2.5 credits

This course is an overview of the historical, social, political, economic, and cultural factors that have helped shape the experiences of African Americans in the United States. It will investigate the development of African American communities from the Middle Passage to the present. The course will focus on definitions of African American identity, influences and achievements within American culture, and issues confronting African Americans from their enslavement in America to the present.

#### Introduction To Law Grades 10-12 5 credits

This course is designed to help the students acquire basic knowledge of his/her rights and responsibilities in our legal systems. Areas covered are contracts, civil and criminal law, a review on court procedures and criminal investigation. Students with specific interests other than law may acquire, through this course, an adequate legal background.

### Psychology Grades 10-12 5 credits

This course will provide a broad introduction into the field of Psychology. Areas covered are biological bases of behavior, sleep and consciousness, memory and cognition, motivation and emotions, personality, developmental theories and abnormal psychology. This survey of psychology will acquaint students with the major concepts and terminology of the discipline and give students a better understanding of self and others.

#### Sociology Grades 10-12 2.5 credits

This course is an introduction to the study of sociology which includes an examination of human behavior and the various social institutions (economic, governmental, and religious) that influence it. Other topics include social groups, socialization, culture, and social class. Relations of the individual to his society and the change that can result will also be examined. This is an elective and is recommended for students preparing for college.

### Adv. Placement Psychology Grade 11-12 5 credits

The AP Psychology course introduces students to the systematic and scientific study of human behavior and mental processes. While considering the psychologists and studies that have shaped the field, students explore and apply psychological theories, key concepts, and phenomena associated with such

topics as the biological bases of behavior, sensation and perception, learning and cognition, motivation, developmental psychology, testing and individual differences, treatment of abnormal behavior, and social psychology. Throughout the course, students employ psychological research methods, including ethical considerations, as they use the scientific method, analyze bias, evaluate claims and evidence, and effectively communicate ideas.

### Economics Grades 11 - 12 2.5 credits

Economics is a one-semester course designed to provide students with a basic grasp of economic theory and economic systems. The course will examine the role of business, workers and consumers, and money and banking, in the American system of free enterprise. Finally, students will examine the role of the government in managing the economy, the global economy, and personal finance issues.

### History Through Film & Media Grades 10-12 2.5 credits

Through the use of films, the Internet, television, newspapers and magazines, students will study a variety of issues and problems that society has faced, and continues to face today. This course will also examine how accurately Hollywood portrays historical vents and characters, and what dangers exist for American democracy if a large portion of our population believes in a history that never really happened. Using films, as well as primary and secondary sources, students will analyze the accuracy and impact of Hollywood films and United States history. The course will also cover both the national and international scene, and will include current events as well as current issues. Included will be videos and discussions related to: prejudice, terrorism, censorship, capital punishment, citizenship and the rights of individuals under the law.

### Holocaust and Genocide Grades 10-12 2.5 credits

This course explores the Jewish Holocaust during World War II, as well as contemporary examples of Genocide. In addition, students will learn about what can happen when prejudice and discrimination are allowed to flourish and individuals and governments fail to take a stand against injustice. Ultimately, students will have the opportunity to define their own role as responsible citizens of the world.

### **World Languages**

#### College Prep. Spanish I Grades 9-12 5 credits

This is an introductory course to Spanish language and culture. This course will provide students with basic vocabulary such as: numbers, days, months, colors, telling time and the alphabet. Students will use present tense. This course will cover many topics in depth such as: shopping, school supplies and courses, home, family members, restaurant and food. There will also be a huge

emphasis on culture including the importance of 'Cinco de mayo', "Navidad', 'Los dias de los muertos' and much more. Students will be able to make authentic Spanish menus. The students will also study the geography and some cultural similarities/differences of the 21 official Spanish-speaking countries.

### Honors Spanish I Grades 9-12 5 credits

This course is an accelerated and rigorous introduction to the Spanish language and culture. A high level of student participation is achieved through the use of the materials and activities designed by the teacher to enable the student to use the language correctly for communication and the basic skills of listening, speaking, reading, and writing. The program is especially designed to prepare students for higher level course in IB Spanish B and AP upon completion of the Level I Honors Program.

### College Prep. Spanish II Grades 10-12 5 credits Prereq: CP Spanish I

This course is a continuation of Español I. This course will provide students with additional language skills and will focus on a variety of topics such as: travel arrangements, reservations and service in restaurants, one's daily routine, pastimes, health and vacations. Students will be able to use both present and preterit (past tense). There will be many cultural aspects such as: "Jai-Alai', Cuzco y Machu Pichu, and much more. The students will also study the geography and some cultural similarities/differences of the 21 official Spanish-speaking countries.

### Honors Spanish II Grades 10-12 5 credits Prereq: Honors Spanish II

This course is an accelerated and rigorous continuation of the Spanish language and culture. A high level of student participation is achieved through the use of the materials and activities designed by the teacher to enable the student to use the language correctly for communication and the basic skills of listening, speaking, reading, and writing. The program is especially designed to prepare students for higher level course in IB Spanish B and AP upon completion of the Level II Honors Program.

#### Honors Spanish III Grades 11-12 5 credits

This course is a continuation of Español II, as well as, a preparation for Spanish 4 (AP Spanish). In this course the students will be able to master all previous and new topics. The topics of Español III are: art, giving/receiving directions, food, creating recipes, and different professions/careers and the community. Students will be able to use present, preterit, imperfect and future tenses. Some cultural aspects will include: history of Spain and Latin America, many Spanish speaking artists like Diego Rivera, Frida Kahlo and Pablo Picasso, myths and legends. The students will also study the geography and some cultural similarities/differences of the 21 official Spanish-speaking countries. Book: *Paso a Paso 3* 

### Adv. Placement Spanish Grade 12 5 credits

This course is a continuation of Español III. In this course the students will be able to master all previous and new topics. This course is compared to a fifth or sixth semester University Spanish course. This course will be a rigorous, language, culture and technology based course that will allow to students to demonstrate their proficiency across three communicative modes: Interpersonal, Interpretive and Presentational, as well as integrating the five goals: Communication, Cultures, Connections, Comparisons and Communities. AP Spanish will provide regular opportunities for students to read, write, listen, speak and critically think in Spanish. Students will learn about Spanish culture through the use of authentic materials and resources. These include a wide range of sources; online print, audio and audiovisual resources, podcasts, magazine and newspaper articles, essays, literary works, interviews, movies and images. Students and teacher alike will use exclusively Spanish, which will advance and strengthen the students' proficiency to Intermediate to Pre-Advanced range. Students will be assessed internally and externally by AP for their skills of listening, speaking, reading and writing.

### College Prep. French I

Grades 9-12 5 credits

This course aims to develop a basic understanding of French with stress on the French language and culture of France. The ability to use French orally and in writing within the limits of class materials is stressed and an adequate understanding and knowledge of grammar and syntax essential to reading comprehension is developed.

### College Prep. French II Grades 10-12 5 credits Prereq: CP French I

This course aims to extend understanding of French and is a continuation of the first year of French.

### College Prep. French III Grades 11-12 5 credits Prereq: CP French II

This course aims to extend understanding of French and is a continuation of the second year of French.

### College Prep. Russian I Grades 9-12 5 credits

This course is designed to offer students the opportunity to develop basic conversational skill as well as to master reading and writing skills using the Cyrillic alphabet. Students will become acquainted with various aspects of Russian culture including history, music, geography movies and folktales. Although emphasis will be placed on speaking and comprehension, students will be exposed to basic Russian grammar and syntax.

### College Prep. Russian II Grade 10-12 5 credits Prereq: CP Russian I

This course is a continuation of Russian I offering more extensive knowledge of grammar and syntax. It demands a higher level of complexity in conversational skills. Students are expected to perfect their skills working with the dictionary.

### **Health & Wellness Education**

### Introduction to Health & Wellness Grade 9 4 or 5 credits\*

This integrated health and physical education program will include:

<u>Introduction to Health</u>—Health and wellness, physical fitness and health, alcohol and tobacco, building healthy peer relationships, infectious diseases, reproduction, and nutrition.

<u>Wellness I</u>—Personal fitness (emphasis on cardiovascular fitness, muscular endurance, and muscular strength), 'new games', tennis, and volleyball.

### Highway Safety & Wellness Grade 10 4 or 5 credits\*

This integrated health and physical education program will include:

<u>Highway Safety</u>—Driving strategies, driver fitness, driving in the HTS, alcohol/other drugs and driving, road hazards and vehicle failure, owning and maintaining a vehicle.

<u>Wellness II</u>—Personal fitness (emphasis on cardiovascular fitness, flexibility, and power), 'cooperative games', recreational activities, and soccer.

#### Lifetime Health & Wellness Grades 11-12 4 or 5 credits\*

This integrated health and physical education program will include:

<u>Lifetime Health</u> — Stress management, budgeting and planning, safety addictions, non-infectious diseases, chronic diseases, domestic violence prevention, conflict resolution, nutrition, and human development (adulthood through old age).

<u>Wellness</u> — Personal fitness, cardiovascular fitness, speed, coordination, frisbee games, golf, and softball.

### Personal Health & Wellness Grades 11-12 4 or 5 credits\*

This integrated health and physical education program will include: <a href="Personal Health">Personal Health</a> — Mental and emotional health, environmental health, first aid, illegal drugs, HIV/AIDS, violence prevention/conflict resolution, human development — birth through adolescence, and personal nutrition. <a href="Wellness">Wellness</a> — Personal fitness (emphasis on cardio-vascular fitness, agility, and balance, floor hockey, table tennis/badminton, lacrosse/cricket).

### **Health and Physical Education Electives**

### Teen PEP Grade 11-12 4 or 5 credits\*

This class is designed for selected junior students providing them with educational training that addresses a range of topics related to sexual health. It gives these peer educators the information, communication skills, and confidence to be effective sexual health advocates and leaders among the student body by conducting a series of structured workshops with groups of younger students.

\* 4 credits if student is enrolled in a science lab

### **<u>Dance</u>** EXPLORATORY DANCE COURSES

Invitation to the Arts Grade 9 5 credits

See Course description with Art Courses on Page 35.

#### CHOREOGRAPHY SERIES

### Dance Composition Grades 9-12 5 credits

This course is designed to introduce students to basic composition and choreography concepts. Students will learn and discuss selected choreographic works from all dance forms including hip hop. Students will compose different choreographic works using basic elements of dance and form. Students will see a variety of choreographies on video and film. There will be opportunities to see live and/or videotaped performances.

### Choreographic Projects Grades 9-12 5 credits Prereq: Dance Composition or Instructor recommendation

This course is designed to build upon the concepts learned in Dance Composition. Students will build a choreographic work that will include learning how to select dancers, music, costumes, hair design, lighting and computer generated technology. There will be opportunities to see live and/or videotaped performances.

#### PERFORMANCE DANCE SERIES

#### Performance Introduction Grades 9-12 5 credits

An emphasis is placed on developing good performance skills in jazz, ballet, and modern concert dance forms. Students will perform in the SHS Dance Ensemble (SHSDE). The dance ensemble has a performance season that includes several performances from December through May. There will be opportunities to see live and/or videotaped performances within the region.

### **Performance Concepts**

### Grades 9-12

#### 5 credits

#### Prereq: Performance Introduction or Instructor recommendation

This course is a continuation of Performance Introduction. An emphasis is placed on developing good performance skills in jazz, ballet, and modern concert dance forms. Students will perform in the SHS Dance Ensemble (SHSDE). The dance ensemble has a performance season that includes several performances from December through May. There will be opportunities to see live and/or videotaped performances within the region.

### Performance Internship Grades 10-12 5 credits

#### **Prereq: Performance Concepts or Instructor recommendation**

This course is designed for the student in the dance program for two or more consecutive years. Students will create a portfolio of work as well as a resume and will perform with the SHS Dance Ensemble with the opportunity, when applicable, create choreography, and assist the director in rehearsing the Ensemble for performances during the season from December through May. There will be opportunities to see live and/or videotaped performances.

### Performance Application Grades 10-12 5 credits Prereq: Performance Internship or Instructor recommendation

This course is a continuation of Performance Internship and is for the serious dancer. The emphasis of this course is to design dance pieces that will build and enhance the students' artistic sensibility and technical skill. The student will have the opportunity to explore their own creative voice through choreography and performance. Students will perform in the Salem High School Dance Ensemble (SHSDE). The ensemble has a performance season that includes several performances from December through May. There will be opportunities to see live and/or videotaped performances within the region.

### Performance Techniques Grades 11-12 5 credits Prereq: Performance Applications or Instructor recommendation

This course is designed for the student who has been in the dance program for three or more full consecutive years. This course is a continuation of Performance Applications. This course is designed to increase and enhance the skills the students have been building as participants of the Performance course sequence. Students will continue study in different dance techniques including ballet (Vagonova Method), Jazz, Modern and a form of African dance technique. Students will perform with the Salem High School Dance Ensemble. The dance ensemble has a performance season that includes several performances from December through May.

### Performance Methods Grades 11-12 5 credits Prereq: Performance Techniques or Instructor recommendation

This course is the culmination of the Performance course series and is designed for the student who has devoted three or more full years of dance study within the Salem dance program. Students will assist in directing, designing and staging works for the Spring concert. This course is designed with the student who wishes to pursue an advanced major or minor dance degree or Students will be encourage to attend workshops throughout the Northeast region to enhance their skills. Students will perform with the Salem High Dance Ensemble and will be encouraged to stage new works and assist the director in rehearsing the ensemble for performances during the season. There will be opportunities to see live and/or videotaped performances within the region.

### **Business Technology**

### Computer Applications I Grades 9-12

5 credits

This course prepares students to use the Windows computer operating system as a communication tool. Students may have the opportunity to take the Microsoft Office Specialist Exam and obtain a certification in Word 2016 and Excel 2016. Students are introduced to basic keyboarding skills and taught skills to improve speed and accuracy. Students become proficient in the computer applications of Microsoft Word, Microsoft Excel, Microsoft PowerPoint and Microsoft Publisher.

### Computer Applications II Grades 10-12 5 credits Prereq: Computer Applications I

Students may have the opportunity to take Microsoft Office Specialist Exams and obtain certifications in Word, Excel, PowerPoint, and Access 2016. Students will learn the concepts for each of these areas using Access for database and Excel for spreadsheets. Using Excel, students will learn to manage and prepare reports to create table, graphs and other numerical based presentations which will include planning and creating spreadsheets and formatting using formulas. Using Access, students will learn to design and create database, create forms and reports, and apply queries using the Reports Wizard and the AutoForm Wizard. Each student will also learn how to apply the applications of exporting and importing information between outside database programs.

#### Desktop Publishing Grades 10 - 12 5 credits

Enter the field of desktop publishing and marketing. Design projects such as stationery, logos, greeting cards, business cards, calendars, newsletters, flyers and programs using Microsoft Publisher. Students will also utilize additional technology such as scanners, digital cameras, button makers and book binding machine.

### Image Editing Grades 9-12 5 credits

This course will introduce students to the graphic design field. Adobe Photoshop is used to color, paint, retouch photos, and alter images. Many special effects will be used to create one-of-a-kind designs to produce buttons, greeting cards, animation, and calendars. Movie Maker is used to create movies. Scanners, digital cameras, and color laser printers will be used.

### Graphic Design Grades 10-12 5 credits

### **Recommend: Image Editing**

Learn how to draw computer graphics using Adobe Illustrator. Illustrator is a standard in the graphic arts industry and is used by thousands of artists around the world. Students create logos and package labels.

### Web Design Grade 11-12 5 credits

#### **Recommend: Graphic Design or Image Editing**

This is an advanced level course. Students will construct web pages using Adobe Dreamweaver. Adobe Photoshop and Illustrator will be used to create backgrounds and buttons. Adobe Flash will be used to create animation. Web pages will be constructed for a variety of outcomes and organizations. Students will submit drafts, make revisions and maintain web pages just as is done in the industry. Web sites such as Weebly.com will be used to show students how to create web sites from home without software. In keeping up with the advertising field, students will use Knowledge Matters which is a virtual business retail simulation to demonstrate skills in the 4 P's of marketing (product, place, price and promotion),

### Automated Accounting I Grades 9-12 5 credits

Students learn the basic principles, practices procedure and terminology used by business in maintaining financial records through the application of generally accepted accounting principles. In studying the logical sequence of the accounting cycle, students reinforce their understanding through the completion of both manual and automated accounting activities and simulations. Extensive use of the automated accounting software QuickBooks and Microsoft Excel is used in applying automated applications. The course is suited for all students, but especially those interested in business and finances by aiding them in understanding everyday consumer transactions, comprehending the meaning of profitability in the job market, or selecting a career/college path.

### Automated Accounting II Grades 10-12 5 credits Prereq: Automated Accounting I

This course integrates extensive computer technology into the theory and current practices of accounting and is a continuation of the Automated Accounting course. Students interested in career opportunities in the area of business management, accounting, or finance professions should enroll in this course. It is designed primarily for those students who have a desire to attend college and major in the fields of accounting, finance, or business management. All students enrolled in the class will broaden and improve their knowledge, understanding, and applications of accounting competencies.

### Career Exploration Grade 11-12 2.5 credits

This is a course offered to juniors and seniors and is designed to empower and prepare our students in the skills needed to achieve success in a global environment. The primary components of the course include utilizing self-

assessments tools (Naviance) to research and analyze career and educational information and choices, gain financial literacy by using online programs, understanding how changes in a global economy will impact career choices, college research, visits from guest speakers which will enhance their communication, listening, interviewing, and public speaking skills. Student will also create a resume, complete the common college application and essay, and enhance interview skills.

### Electronic Publishing I Grades 10-12 5 credits Prereq: Image Editing, Graphic Design and/or permission of instructor

The class is an advanced level course providing students the opportunity to plan, develop and generate a professional quality publication while enhancing their journalism, technological, teamwork, and organizational skills. Students will work cooperatively with other team members in developing a layout theme, designing specialized page layouts, applying photojournalism skills, scheduling photograph sessions, coordinating internal and external marketing ideas, and meeting deadlines. Classroom work will consist of participating in discussions and demonstrations, layout and design, electronic publishing, photo editing, storyboarding, working in groups, and operating a computerized system utilizing Yearbook.com.

### Electronic Publishing II Grade 11-12 5 credits Prereq: Electronic Publishing I

This course will allow students who have previously taken Electronic Publishing I to enhance their knowledge in the areas of graphic design, media publications, digital photography, copy/captions, marketing, sales and product distribution. Students enrolled in this class will be required to assume the responsibility of a section/publication editor. Section editors will assist and instruct members of their section in the use of digital cameras, scanners and graphic application software. Editors will also work closely with their staff to ensure digital photo accuracy and clarity, page creation in compliance with software specification, page development and consistency within sections. The adherence to deadline submission, team commitment, and leadership skills will be emphasized and encouraged. Students will work with Adobe Photoshop.

### **Applied Technology**

### Introduction to Engineering Design

Project Lead the Way Grades 9-12 5 credits

Students dig deep into the engineering design process, applying math, science, and engineering standards to hands-on projects. They work both individually and in teams to design solutions to a variety of problems using 3D modeling software and document their work in an engineering notebook.

### **Principles of Engineering**

Project Lead the Way Grades 10-12 5 credits

**Prereq: Introduction to Engineering** 

Through problems that engage and challenge, students explore a broad range of engineering topics including mechanisms, the strength of structures and materials, and automation. Students develop skills in problem solving, research, and design while learning strategies for design process documentation, collaboration, and presentation.

### **Civil Engineering and Architecture**

Project Lead the Way Grades 10-12 5 credits

**Prereq: Principles of Engineering** 

Students learn important aspects of building and site design and development. They apply math, science, and standard engineering practices to design both residential and commercial projects and document their work using 3\_D architecture design software.

### Invitation to the Arts (Video) Grade 9

5 credits

See course description with Art courses on Page 36.

### Basic Video Production Grades 10 -12 5 credits

A basic video production course should include: history of the media, the business of mass media, writing for video, the aesthetics of video, the science of video and actual "hands-on" work with equipment. The course will contain classroom work as well as work outside the classroom. Students will learn all aspects of video production and their work will culminate in worthwhile "published" projects. Some of these projects can be a video yearbook, public service announcements, morning announcements, talk shows or documentaries

### Video Programming & Digital Editing Grades 10-12 5 credits Prereq: Invitation to Arts, Basic Video Production or Instructor recommendation

Following up on production techniques acquired in Basic Video Production, students in this course will concentrate on long format video productions. They will produce live morning announcements, sports videos, talk shows, videos for any department in the district, and promotional videos for the district. Students will also serve as producers of the video yearbook and master the art of digital editing. They may also serve as lab supervisors for Basic Video Production classes.

### Cable Access Programming Grade 11-12 5 credits

Prereq: Video Programming & Digital Editing or Instructor recommendation

This is the third class in the series. Fusing all the skills acquired in previous video courses, students in this class will be responsible for maintaining and programming the district's cable access channel programming. They will serve as executive producers and editors-in-chief of the video yearbook. Students will be required to serve as lab supervisors for the Video Programming & Digital Editing classes. These students will also research, write, and produce a documentary video as their capstone project.

## News and Sports Reporting Production Grades 11-12 2.5 or 5 credits Prereq: Video Production & Digital Editing, Cable Access Programming, or Instructor recommendation

In this class students will utilize and improve skills acquired in the prerequisites. In news and sports reporting, students will gather sports and news footage, create news and sports packages, provide voice over for athletic events to be shown on our access channel, provide in-depth news coverage of school and community events to enhance our morning announcements and our access programs. Emphasis will be placed on performance, writing, independent work, work place readiness, and critical thinking.

### <u>Art</u>

#### Invitation to the Arts Grade 9 5 credits

This course is a required course for all incoming 9th grade students and is designed to introduce students to the programs of study in the Fine and Performing Arts Department. Students will explore classes in Video Technology, Visual Arts, Music, and Dance for a marking period exploratory segment Through a collaborative theme and vocabulary, students will explore content and skills in each area. (This course is required for all incoming 9th grade students and will count for their high school fine arts requirement.)

### Drawing and Painting Grades 9 - 12 5 credits

This course is designed to further develop drawing and painting skills. This course is designed to enhance knowledge of elements and principles of design, utilize an art vocabulary, and introduced to various art history through project-based assignments. Students will develop techniques applying many materials such as pencil, watercolor, pastels, markers, tempera, and or acrylic paint. Art history will be introduced but the emphasis is on the creative response. Throughout this course students will gain a technical competence observing, recording, and interpreting visually their environment individual artistic expression, and writing about their experience using artistic vocabulary. Students will be required to draw in a sketchbook as homework. (Mandatory attendance is required during the art exhibit.)

#### **Artistic Ceramics**

#### Grades 9 - 12 5 credits

This course is designed for the creative student interested in a hands-on experience in creating pottery. Exploration of ceramic hand building techniques such as making pinch, slab, and coil construction will be addressed creating different vessels,. Students will also glaze their creations. Some drawing required for assignments. (Mandatory attendance is required during the art exhibit.)

### Independent Painting and Drawing Grades 11-12 5 credits Prereq: Invitation to the Arts and Drawing and Painting

This class is offered to art students who have passed Invitation to the Arts, Drawing and Painting with a C or better. This course is designed for students interested in developing a portfolio for college admission and or perfecting their artistic ability. Students will work on independent assignments along with some group projects. Students will experiment with the following media: acrylic, watercolor, oil, pastels, charcoal and pencil. Students will be required to maintain a sketch book. (Mandatory attendance is required during the art exhibit.)

### Music

#### **Invitation to the Arts**

Grade 9

5 credits

See course description on Page 36.

### **Marching Band**

Grades 9-12

5 credits

Marching band is a course designed to provide the instrumentalist with the opportunity to perform at football games, parades, and concerts. The aim of this course is to learn and perform a marching band show. Attendance at all football games and night rehearsals is required. Students who elect to participate in this course must have a minimum of one year experience on the instrument they intend to play.

### Concert Band Grades 9-12 5 credits

Concert Band is a course designed to provide the instrumentalist with rehearsal and performance experience through an emphasis on the development of musicianship and professionalism. All styles of music are investigated, rehearsed, and performed during the course of the semester. During the fall students will have the opportunity to perform in the marching band at all football games, parades, and concerts. Students will learn and perform a marching band show. Attendance at all football games and night rehearsals is required. Students who elect to participate in this course must have a minimum of one year experience on the instrument they intend to play.

### Jazz Band Grades 9-12 2.5 credits

Offered to advanced instrumental students with at least one year experience on their instrument and full participation in the concert/marching band. All

students must audition for the class and will be recommended by the director for admission into this course. Emphasis is on advanced instrumental techniques, performance of jazz music for the ensemble, and preparation to play in the commercial music field.

### Beginning Instrumental Music Grades 9-12 2.5 credits

This course focuses on the development of fundamental music skills: note reading, rhythms, and instrument technique. This course is open to any student wishing to play a musical instrument with less than one year of experience.

### Concert Choir Grades 9 - 12 5 credits

Choir is an elective course open to all students. All styles of music are studied from early times to present day. Performance and vocal techniques, musicianship, repertoire, and poise are stressed. Participation at performances throughout the year is required.

### **Keyboarding and Songwriting** Grades 9-12 2.5 credits

This course is for anyone with an interest in learning basic piano skills as well as how to write songs. Basic music theory will be covered, including the necessary skills to write songs in various genres of music. Students will also be offered private lessons along with their classroom experience.

#### Musical Theater Grades 9-12 2.5 credits

This course covers any and all things musical theater. Students will learn not only the history of musical theater, but they will also learn about the technique of musical theatre as well as everything that happens behind the scenes. The final project will involve each student in a student designed mini-performance.

### Chamber Music Grades 9-12 2.5 credits

Chamber Music is a course designed for instrumental and vocal students who wish to explore music performed by one player for each part as opposed to orchestral/band music in which there are several players for each part. The program is aimed at performance and will deal with soloists and small ensembles. Performance techniques, musicianship, repertoire, and poise are stressed. (Students may elect this course for a semester if it cannot be scheduled for a full year.)

#### Music Technology Grades 9-12 2.5 credits

This course is for advanced students who are interested in making music with computers. A lot of time will be devoted to learning how to operate a recording studio and various recording technology. Students will become familiar with the software and hardware standards of the recording industry. Students will need to complete readings, listening examples, be able to work on extended projects, and be able to work both independently and collaboratively.

### **Family & Consumer Science**

### Food, Family & Finances Grades 10-12 5 credits

This is an independent living course in which students will examine choices related to the foods they eat, caring for a family, and managing their finances. Students will plan and prepare foods with a focus on nutritional value, safety, sanitation, and the uses of kitchen equipment. Family responsibility will be emphasized as students investigate decisions to be made in caring for and raising a child. Students will participate in personal & family finance simulations as they explore consumer rights and responsibilities to become informed educated consumers.

### Sewing For The Home Grades 9-12 2.5 credits

Students in this course will learn the basics of sewing both by hand and machine for personal use, or as an opportunity to create a future business. They will be taught how to identify and care for fibers and fabrics and how to measure accurately to determine quantities of supplies to complete a project. Projects will consist of constructing products for the home i.e. pillows, curtains, fabric shades, tablecloths etc. There are no pre-requisites, but knowledge of geometry would be helpful. Students must purchase materials and supplies independently (a list will be provided).

### Introductory Care Giving Grades 10 –11 5 credits

This course is for students interested in child or adult care careers. Students will gain valuable information regarding developmental issues that impact children and older adults in addition to learning how to set up educational and recreational activities for each. Students will explore career options in these care giving occupations.

### **Special Education**

The Resource Center programs offer individual and small group instruction designed to educate classified students in the least restrictive environment according to I.D.E.A. (Individuals with Disabilities Education Act), the laws of New Jersey and the student's Individualized Educational Program. The Resource Center student must meet mandated requirements for a New Jersey High School diploma including number and type of credits, attendance, and grade average for passing classes. Any exception must be stated in student's Individualized Education Program (IEP). Typically, students are enrolled in these courses as a result of IEP implementation.

For students who have been identified by the Child Study Team, a Special Needs program is available. Students will be scheduled for these courses by a member of the Child Study Team in consultation with the student's school counselor in accordance with the Individual Educational Plan (IEP).
